1.0 INTRODUCTION

McCabe Environmental Services, L.L.C. (McCabe) was retained by Glen Rock Board of Education to conduct lead in drinking water testing at Coleman Elementary School located at 100 Pinelynn Road, Glen Rock, New Jersey 07452.

The project information is as follows:

Client Name: Glen Rock Board of Education

Contact Person: Ms. Sandy Marinos

Project Name: Coleman Elementary School- Lead in Drinking Water Sampling

Project Location: 100 Pinelynn Road
Glen Rock, New Jersey 07452

Date(s) of Service: March 23, 2018

McCabe Personnel: Gary Clare & Thomas Halter

2.0 SCOPE OF WORK

Drinking water testing was performed at Coleman Elementary School located at 100 Pinelynn Road, Glen Rock, New Jersey 07452 on March 23, 2018. The purpose of the testing was to determine if the building's plumbing was having an adverse impact on water quality, specifically with regard to lead concentrations after the installation of Elkay WaterSentry VII filters. Samples were collected from only the fountains that had this installation done.

3.0 PROCEDURES

After determining which outlets would be sampled, McCabe personnel collected a "first draw" sample at each location. A "first draw" is the initial water that is first to come out of the tap after a period of inactivity. All samples were collected into 250 mL sterile bottles, labeled with a sample identification, and analyzed in accordance with EPA approved methods to determine the level of lead in drinking water. Samples were analyzed by an accredited laboratory.

The U.S. Environmental Protection Agency (EPA) has established National Primary Drinking Water Regulations (NPDWR) that set mandatory water quality standards for drinking water contaminants. These are enforceable standards called "maximum contaminant levels" or "MCL", which are established to protect the public against consumption of drinking water contaminants that present a risk to human health. An MCL is the maximum allowable amount of a contaminant in drinking water which is delivered to the consumer.

The EPA has established the Lead and Copper Rule that sets standards for state and public water systems. This rule has set an MCL for lead at 15 parts per billion (ppb) for a one liter sample. However, the EPA also established the Lead in Drinking Water at Schools and Child Care Facilities in which the EPA recommends an MCL of 20 ppb for a 250 milliliter first draw sample. In order to be more stringent, for our report purposes we have compared all results to both the 15 ppb and the 20 ppb standards.

4.0 TABLE OF SAMPLE RESULTS

The following table presents all sample results in order of sample identification:

Sample ID	Sample Location	Lead Result (ppb)	Exceeds (MCL 15 ppb)	Exceeds (MCL 20 ppb)
C-01	Room K-1	< 0.5	PASS	PASS
C-02	Room K-2	< 0.5	PASS	PASS
C-03	Room 5	1.3	PASS	PASS
C-04	Room 4A	2.5	PASS	PASS
C-05	Room 4	< 0.5	PASS	PASS
C-06	Room 3	< 0.5	PASS	PASS
C-07	Room 2	< 0.5	PASS	PASS
C-08	Room 1	< 0.5	PASS	PASS

5.0 DISCUSSION AND CONCLUSION

A total of eight (8) samples were collected from Coleman Elementary School. All samples were found to be less than the EPA Lead in Drinking Water at Schools and Child Care Facilities standard of 20 ppb, as well as the EPA Lead and Copper Rule standard of 15 ppb.

In addition, McCabe Environmental recommends annual drinking water sampling to ensure that the building's plumbing is not having an adverse impact on water quality.

APPENDIX A

**LABORATORY CERTIFICATES OF ANALYSIS
&
SAMPLE CHAIN OF CUSTODY FORMS**

Wednesday, March 28, 2018

Attn: Janet Leone
McCabe Environmental Services, LLC

Lyndhurst, New Jersey 07071

Project ID: 18-03480
Sample ID#s: CA07734 - CA07741

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory. This report is incomplete unless all pages indicated in the pagination at the bottom of the page are included.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Phyllis Shiller".

Phyllis/Shiller
